

INDEX TO VOLUME 142, JANUARY-JUNE, 1930

Lack of space makes it impossible to give many cross-references or to enter a given reference in more than one place. Each article is therefore entered where it is believed it will be most easily found. In every case, the general subject should be sought rather than the supposed specific title of an article. We call special attention to the classifications "Aviation," "Engineering," "Medicine," "Miscellaneous," etc., under which many items will be found, the location of which otherwise would be very puzzling.
